Next summer, Caltrans will demolish and rebuild a segment of the deck of Highway 101 at Alemany Circle, just north of the interchange with I-280.

Traffic will be severely impacted in both directions. Expect speed reductions, lane reductions, and rerouting of all traffic onto city streets.

For more details, go to the project website at 101AlemanyProject.com

---

**How to prepare**

**Leave the Bay**
If you’re planning to take a summer vacation, consider choosing dates that overlap with the deck replacement. Even if you don’t take the 101 to get to and from work, chances are your commute will be impacted by 101 commuters taking alternative routes.

**Work remotely**
Explore telework as an option with your employer. If you can’t leave the Bay, the next best thing is to avoid the commute altogether.

**Adjust work hours**
Try shifting your work schedule to avoid the peak commuter hours.

---

**Try transit**
Start researching your public transit options now. You can test out your trip with Commute.org’s FREE transit ticket program. Maybe you’ll discover options you didn’t know existed and decide to stick with them all year round! There will also be expanded transit service during the project, including extra BART cars and likely extra ferry service.

**Start carpooling**
Carpooling is a great alternative to the other options, and BART will have reservable guaranteed carpool parking at stations. Talk to your co-workers to find options to commute together. You can also use Scoop and Waze Carpool apps, and Commute.org will reward you with $100 for carpooling with either app.
